The Fund is managed by Waystone Management Company (IE) Limited (the “Manager”)

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Objectives and Investment Policy

The Fund seeks capital appreciation through investment in a limited number of small, dynamic and sustainable growth companies and to outperform the Russell 2000 Growth Index (the “Index”).

The Fund primarily invests in Equities of Small Cap Companies located in or having substantial business ties to the United States. Typically the Fund’s assets will be invested in securities of approximately 40 companies from various sectors including: technology services, internet, consumer, and business services. At the time of investment the Fund may invest up to 8% of its assets in a security, the value of which may increase to up to 10% of the Fund’s assets after purchase.

Granahan Investment Management LLC (the “Investment Manager”) utilises a risk/reward and expected return on investment methodology to analyse investments for their potential impact on the Fund prior to investment and on an on-going basis. The Investment Manager seeks to invest in Equities with sustainable growth characteristics that will provide the best potential for superior long-term performance against the Index. Sustainable growth characteristics include: large open-ended market opportunities for the securities, strong competitive positions and customer value propositions, strong financial positions and cash flows and management teams which the Investment Manager considers to be able to deliver these characteristics over the long-term.

For Accumulating Classes, any income less expenses will be accumulated and reinvested into the Fund. For

Distributing Classes, any income less expenses earned will be distributed in accordance with the distribution policy in the prospectus.

Investors can redeem shares each day (except Saturdays and Sundays and normal bank holidays) on which banks in Dublin and New York are open for regular business.

The Fund uses the Index as a target for the for the performance of the Fund but not to constrain portfolio composition. The Fund is actively managed and is not constrained by any benchmark

For full investment objective and policy details, please refer to the “Investment Objective” and “Investment Policies” sections of the Fund’s supplement.

Recommendation: This Fund is appropriate as a long term investment option.

Equities: securities representing an equity instrument in a company including shares and stocks, American Depositary Receipts (“ADRs”) and Global Depositary Receipts (“GDRs”). ADR/GDRs enable investors to buy securities of foreign companies without the associated risks of cross-border purchases of shares. ADRs and GDRs usually pay dividends and are treated in a similar way to ordinary shares.

Small Cap Companies: companies with market capitalisations within the range of the Russell 2000™ Growth Index at the time of purchase.

Risk and Reward Profile

The Fund is in category 7 as it mostly invests in shares and similar instruments of companies with smaller market capital values which typically experience higher levels of price fluctuations than such securities of companies with larger market capital values.

The risk indicator was calculated using simulated data and may not be a reliable indication of the future risk profile of the Fund. The risk category shown is not guaranteed and may change over time.

In pursuing its investment objective the Fund will be exposed to additional risks including without limitation:

Liquidity Risk: the Fund may not always find another party willing to purchase an asset that the Fund wants to sell which could impact the Fund’s ability to meet redemption requests on demand.

Custodial Risk: insolvency, breaches of duty of care or misconduct of a custodian or sub-custodian responsible for the safe keeping of the Fund’s assets can result in loss to the Fund.

Small Cap Risk: investing in the securities of smaller, lesser-known companies may involve greater risk due to the less certain growth prospects, the lower degree of liquidity (see liquidity risk) of such shares and the greater sensitivity of small companies to changing economic conditions.

Equity Investments Risk: equity investments are subject to greater fluctuations in market value than other asset classes as a result of such factors as a company’s business performance, investor perceptions, stock market trends and general economic conditions. The Fund’s Net Asset Value may be impacted accordingly.

Counterparty Risk: a party with whom the Fund contracts for securities may fail to meet its obligations or become bankrupt which may expose the Fund to a financial loss.

Concentration Risk: the Fund’s investments may be concentrated in a small number of companies and sectors which may lead to greater price fluctuations than if the Fund was invested in a broader number of companies and range of sectors.

Foreign Currency Risk: changes in exchange rates may reduce or increase the value of non-U.S. Dollar denominated assets held by the Fund. The Manager will not hedge against these risks.

Class Currency Risks (Representative Classes): (Hedged Classes) there can be no guarantee that currency hedging will be successful in mitigating the effects of currency fluctuations on non-USD classes. (Unhedged Classes) performance of unhedged classes may be affected by changes in the exchange rates between the class currency and the US Dollar.

Operational Risk: material losses to the Fund may arise as a result of human error, system and/or process failures, inadequate procedures or controls.

Please refer to the section entitled “Investment Risks and Special Considerations” in the Company’s Prospectus for additional information on these and other risks associated with investment in the Fund.
