What is this product?

Type

This is an investment fund established as a company with variable capital and segregated liability between Funds, under the laws of Ireland.

Objectives

Investment objective The Fund seeks capital appreciation through investment in a limited number of small, dynamic and sustainable growth companies and to outperform the Russell 2000 Growth Index (the "Index").

Investment policies The Fund invests primarily in equity securities of small and medium capitalisation ("SMID") companies located in or whose businesses are closely associated with the United States. Typically the Fund's assets will be invested in securities of approximately 40 companies from various sectors including: technology services, internet, consumer, and business services. At the time of investment, the Fund may invest up to 8% of its assets in a security, the value of which may increase to up to 10% of the Fund's assets after purchase. Equities are securities representing an equity instrument in a company including shares and stocks, American Depositary Receipts ("ADRs") and Global Depositary Receipts ("GDRs"). ADR/GDRs enable investors to buy securities of foreign companies without the associated risks of cross-border purchases of shares. ADRs and GDRs usually pay dividends and are treated in a similar way to ordinary shares. Small Cap Companies are companies with market capitalisations within the range of the Russell 2000™ Growth Index at the time of purchase.

Granahan Investment Management, Inc (the "Investment Manager") utilises a risk/reward and expected return on investment methodology to analyse investments for their potential impact on the Fund prior to investment and on an on-going basis.

The Investment Manager seeks to invest in Equities with sustainable growth characteristics that will provide the best potential for superior long-term performance against the Index.

Sustainable growth characteristics include: large open-ended market opportunities for the securities, strong competitive positions and customer value propositions, strong financial positions and cash flows and a management teams which the Investment Manager considers to be able to execute these characteristics over the long-term.

For full investment objective and policy details, please refer to the "Investment Objective" and "Investment Policies" sections of the Fund's supplement.

Benchmark The Fund uses the Russell 2000 Growth Index as a target for the performance of the Fund but not to constrain portfolio

composition. The Fund is actively managed and is not constrained by any benchmark.

Redemption and Dealing Investors can redeem shares each day (except Saturdays and Sundays and normal bank holidays) on which banks in Dublin and New York are open for regular business.

Distribution Policy Any income less expenses will be accumulated and reinvested into the Fund.

Launch date The Fund was launched on 11/04/2014. The share class was launched on 02/11/2020.

Fund Currency The base currency of the Fund is USD. This share class currency is GBP.

Switching Shares in the Fund may be switched for the shares of another share class of the Fund or another sub-fund of the Company, subject to certain conditions and meeting the requirements for investment in such other share classes or sub-funds. See the section entitled "Conversion of Shares" of the Company's prospectus for more information.

Asset Segregation The Fund is a sub-fund of the Company, an umbrella fund with segregated liability between sub-funds, established under the laws of Ireland. This means, if the Company establishes other sub-funds, the assets and liabilities of each sub-fund are segregated by law and cannot be used to pay the liabilities of another sub-fund of the Company.

What happens if Management Company is Waystone Management Company (IE) Limited is unable to pay out?

The Management Company has no obligation to pay out since the Fund design does not contemplate any such payment being made. You are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depository. Should the Fund default, the depository would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario,
- 10,000 GBP is invested.
